https://jsvalle123.github.io/ReactPortfolio-/

Full Stack Web Developer with a background in Anthropology and life-long dedication to expanding my knowledge. Certified as a Full Stack Web Developer and 6 months of experience developing full-stack applications using technologies such as Express, Node, React, and JavaScript. Bilingual; able to collaborate and communicate whether in English or Spanish to problem-solve.

Technical Skills

Languages: JavaScript, NodeJS, ReactJS, HTML/CSS
Other: Git, Express, SQL, MongoDB, Heroku
Applications: Pan-Dammit, STALK, and OunceCounts

Projects

Pan-Dammit | https://github.com/graciela23garcia/Pan-dammit.git |
https://git.heroku.com/pan-dammit.git
This web application helps users decompress - whether it be by blogging about their day and feelings or finding movie suggestions based on what they are looking for.
- Collaborated with a team of 6 throughout the web development process to make this application come to life, focusing on the Front-End.
- Completed the app in about 2 weeks communicating through Google Docs, Zoom, and Slack.
- Front-End Developer – built the wireframe with 3 other team members using Figma. Created the Blog, Login, and Mental Health Resources page using Bulma.
- Consistently reported to our back-end team any improvements made to the UI/UX.
- Developed our presentation slideshow and helped Demo our project.
- **Tools:** MERN Stack (MySQL, Express, Node) Passport, ChartJS.
.

STALK | https://github.com/lillianhuynh/STALK.git | STALK (lillianhuynh.github.io)
A web application that allows users to search specific stock companies and access the information needed and find news articles that help make better decisions in investments.
- Collaborated with a team of 4 to develop test, deploy, focusing on the Back end.
- Fully developed the application within a 2-week period working 100% remotely and documenting all code changes in Github.
- Back-End Developer – built the News API and assisted with developing the front end by styling buttons and storing searches.
- Thoroughly searched for the right API reading through the documentation and implementing it to the app's purpose.
- **Tools:** ChartJS, Bulma, APIs

OunceCounts|https://github.com/daniarinker/OunceCounts.git | https://git.heroku.com/ounce-counts.git
Meant to keep adventurers organized and safe with the benefit of being able to collaborate with friends. This is a useful application for those of us who need a reminder on what is essential for these journeys, and how we can help our wolfpack minimize the weight in their packs.
- Collaborated with a team of 6 to develop, debug, and deploy this web application communicating through Zoom, Kanban board and Slack.
- Completed the app in 4 weeks testing and troubleshooting throughout the phases.
- Full Stack Developer – developed the database using Sequelize, developing the Wolfpack Info page entirely implementing a chat using Socket.io so users can communicate.

- Took the lead in the debugging process in order to save time for deployment.
- **Tools:** MERN Stack (ReactJS, Sequelize, Express, NodeJS) Firebase, Figma, and Socket.io.

Experience

Server   August 2019–October 2019
Greek Isles   Dallas, TX

- Built and maintained excellent customer relationships, leading to having a regular clientele and asked for by name.

- Known amongst management and staff for strong work ethic and being a strong team-player.

- Consistently sold promotional items to help increase revenue.

- Successfully resolve any customer issues and ensure satisfaction with service and meals.

Barista
February 2019 – August 2019
The Henry
Dallas, Tx
- Lead trainer among my coworkers, trusted with the responsibility to prepare new baristas.
- Successfully closed out registers, evening them out and making payouts.
- Committed to guests with 100% satisfaction, and in high regard with the managers and chefs.

Pet Care
November 2017 – August 2018
PetSmart
Plano, TX
- Making sales by educating customers on products and services the company provided which led me to be Employee of the Month and top salesperson.
- Served as a mentor, training new employees on animals and products making sure they felt secure in their knowledge of their responsibilities and duties.
- Created a positive environment for pets and their families when holding our bi-weekly Saturday events, showcasing new products..

Education

Certificate: Full-Stack Web Development   University of Washington, Seattle, WA
Feb 2021
- A 6-Month intensive program where over 200 classroom hours were devoted to gaining technical programming skills in HTML5, CSS3, JavaScript, jQuery, Bootstrap, Firebase, NodeJS, MySQL, MongoDB, Express, Handelbars.js & ReactJS.
